INTRODUCTION

The 1986 Nebraska Jail Population Report presents data collected by and reported to the Jail Standards Division of the Nebraska Commission on Law Enforcement and Criminal Justice. It describes prisoners held in city and county jails during calendar year 1986. All jails in Nebraska are represented in this report except for the Omaha City Jail, Douglas County Corrections, and Lancaster County Corrections.

The Nebraska Revised Statutes 83-4, 192 (1981 Cum. Supp.) calls for the establishment of a "standardized records and statistical system for criminal detention facilities." Accordingly, the Jail Standards Board established a requirement for local jails to utilize a standardized admission and release form and to submit copies to the Jail Standards Division upon processing. A copy of this form is included on the following page. This document serves as the source document for information for the statewide database used by the Nebraska Crime Commission. The three above-named facilities employ in-house automated information systems and are therefore exempt from the reporting requirement.

The information provides demographic statistics as well as jail use and prisoner flow on a statewide and local level. It must be remembered that inmates in Douglas and Lancaster counties account for approximately half of the total number of inmates in the state. Since they are not included in the report, these statistics reflect the jail population outside these metropolitan areas.

Further information or information more specific to given data or particular facilities and agencies may be available, upon request, from the Jail Standards Division.

Section I: Nebraska City and County Jails

For the purpose of determining applicability of Standards, local jail facilities are categorized as follows: Type I Holding Facilities (with a 24 hour limit) and Type II Holding Facilities (with a 96 hour limit) serve primarily to detain persons awaiting initial court appearances on criminal charges, while Type III Detention Facilities are typically used to confine either pretrial or sentenced inmates. Most county jails are designed as Type III Detention Facilities. The city jails and some smaller county facilities operate as either Type I or II Holding Facilities.
